

EDUCATION

UC BERKELEY

B.A. Computer Science
Expected May 2016

Relevant Coursework

- Data Structures
- Machine Structures
- Networks
- Artificial Intelligence
- Algorithms
- Databases
- Operating Systems

WORK EXPERIENCE

Geekin Radio

iOS Developer Intern
May 2015 – Present

- **Built the front-end** for this **social listening music app**
- Developed using **Swift** and integrating **Parse, Firebase, & SoundCloud API**
- **50,000+ Downloads, ranked #10 in music apps, #140 overall within first 2 days of release**
- System automation using **Chef** and deployed cookbooks for **Redis and Django**
- Built an internal **iOS app** (Visa Forums) to be used as a forum for internal discussions as a Proof of Concept to be used to **test internal system automation tools**
- Developed Visa Forums using **Objective-C** and integrating **Parse**
- Built a social scraper using the **Twitter API** to filter tweets by defined parameters and tweet back to specific users
- Implemented in **ruby** and used **MySQL** as a database to store the scraped tweets

VISA inc.

Global Tools and System Automation Intern
June – August 2014

Trident Marketing

Software Engineering Intern
July – August 2013

PROJECTS

Handshake (iOS App)

July 2015

- Built a pseudo-anonymous meet-up app
- Developed using **Objective-C** using **Parse, Firebase, and the Facebook SDK**

This or That (iOS App)

November 2014

- Built an entertaining, social way to ask and answer questions
- Built using **Objective-C** and **Parse**
- Released **on the App Store**: <http://apple.co/1xyZAio> (**1000+ users**)

CollegeWiz.com

Co-founder
November 2012- June 2013

- Created a website to provide college students with information about starting college
- Generated over **100,000 views** on several articles that I wrote

StudyBuddy.me
